Career Objective

Computer Science and Engineering student with hands-on experience in Java, web application development and backend systems, seeking a software engineer role to contribute to innovative projects and enhance technical expertise in a professional environment.

Education

Pranveer Singh Institute Of Technology, Kanpur **B.Tech - Computer Science and Engineering | 2023-Present**
Percentage: 78.18% (Till 6th Semester)

St. Joseph's School, Gorakhnath, Gorakhpur **Intermediate | ISC Board | 2021-2022**
Percentage: 81%

St. Joseph's School, Gorakhnath, Gorakhpur **High School | ICSE Board | 2019-2020**
Percentage: 81%

Skills

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Core:** Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, Database Management Systems
- **Web & Backend:** HTML, CSS, Node.js, Express.js, REST APIs
- **Databases:** MySQL, MongoDB, NoSQL
- **Machine Learning:** Machine Learning, Deep Learning, Scikit-learn, TensorFlow/Keras
- **Tools:** Git, GitHub, Docker, VS Code, Jupyter Notebook
- **Soft Skills:** Communication, Team Player, Time Management, Adaptability

Projects

Lung Cancer Detection *June 2026 - August 2026*
Python, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, SimpleITK, Pillow, TensorFlow/Keras

- Developed an automated lung cancer detection system using a DenseNet121 model with transfer learning to classify CT scan images and identify cancerous nodules with high accuracy.
- Implemented an end-to-end deep learning pipeline, including image preprocessing, data augmentation, and class imbalance handling, to enhance model robustness and improve generalisation across medical imaging datasets.
- Architected a scalable, reproducible AI diagnostic framework for early-stage lung cancer detection, enhancing clinician decision-making speed and accuracy by 90%.

Banking Transaction System *April 2026 - Present*
Node.js, JavaScript, Express.js, MongoDB, HTML, CSS, JWT, Docker

- Implemented ACID-compliant transaction processing with concurrency control, rollback mechanisms, and consistency guarantees to ensure reliable and secure database operations.
- Developed a secure banking transaction system supporting deposits, withdrawals, and fund transfers with robust transaction management and data integrity.

GoBoffin – Job Search Web Application *October 2025 - December 2025*
HTML, CSS, JavaScript, API Integration

- Developed a responsive job search web application using HTML, CSS, and JavaScript with real-time API integration for dynamic job listings.
- Implemented client-side data fetching and filtering logic to improve job search accuracy and enhance user experience.
- Designed a clean, intuitive, and user-friendly interface to enable efficient job discovery, navigation, and interaction across devices.

Achievements & Certifications

- **Solved 350+ data structures and algorithms problems across various coding platforms.**
- **HackerRank:** Java (Basic) Certification
- **Infosys Springboard:** Programming Fundamentals using Python - Part 2
- **Infosys Springboard:** Programming Fundamentals using Python - Part 1
- **Infosys Springboard:** HTML5 – The Language
- **Infosys Springboard:** CSS3
